

PROJECTS

Ins-Bau-Profis | Construction PWA Landing Page

Tech Stack: HTML5 | CSS3 (Flexbox/Grid) | Vanilla JavaScript | PWA (Web Manifest) | ScrollReveal.js

-  **Performance Engineering:** Optimized the critical rendering path by implementing **Resource Hinting (Preload/Preconnect)** and **WebP image compression**, significantly improving Google Lighthouse performance scores.
-  **PWA Integration:** Architected the site as a **Progressive Web App**, configuring a `manifest.json` for full mobile installability (A2HS) and native-like user experience.
-  **Accessibility & SEO:** Engineered a 100% **Semantic HTML** structure and integrated **ARIA (Accessible Rich Internet Applications)** labels to ensure full screen-reader compatibility and high search engine rankings.
-  **Modern UI/UX:** Developed a mobile-first, responsive interface with custom **JavaScript form validation** and fluid scroll animations to increase user engagement.
-  **Asset Optimization:** Leveraged **Lazy Loading** and asynchronous font delivery to minimize initial payload size and reduce Time to Interactive (TTI).
